REASONS FOR ALLOWANCE

Response to Amendment

1. The Amendment after Non-Final Rejection filed on 01/04/2008 has been received and made of record. Examiner notes that the Applicant has cancelled claims 1-3 and 7-9. Claims 4-6 are pending in the application.

Allowable Subject Matter

2. Claims 4-6 are allowed.

The following is an examiner's statement of reasons for allowance: As to independent claim 4, the prior art does not teach or fairly suggest, in combination with the existing elements of the present claim as currently amended, a driving circuit arranged so that after said clamping switch is turned off at a first timing, said clamping switch is continuously held in an OFF state and said first transfer gate is closed at a second timing, thereby holding a first signal which is obtained from said second terminal of said capacitor into said first holding capacitor, and after said clamping switch is turned off at the first timing, said clamping switch is continuously held in the OFF state and said second transfer gate is closed at a third timing, thereby holding a second signal which is obtained from said second terminal of said capacitor into said second holding capacitor.

As to claims 5 and 6, these claims are dependent upon allowable claim 4 and are thus also considered allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
